EDUCATION

University of Washington

Seattle, WA

Bachelor of Science: Aeronautical and Astronautical Engineering (GPA: 3.42)

June 2027

Relevant coursework (through spring 2027): Thermodynamics, Structures, Controls, Flight mechanics, Orbital mechanics, Inviscid aerodynamics, Viscous fluids, Structural Vibrations, Propulsion.

EXPERIENCE

Agricultural Drone Project

Wenatchee, WA

Engineer

June 2026-Present

- Engineered power and data architecture for a 4-rotor UAV, including thrust analysis, companion computer subsystems, and flight data analysis.
- Designed drone specifications to meet 3.5 kg load capacity, 22-minute survey flight time, farmer affordability for sub-\$2000, and future longevity requirements.
- Designed and 3D printed sensor pivot arm, which improved camera visibility by 20%.
- Built telemetry data logging on a Raspberry Pi by using Python and MAVLink to capture in flight data, independent from the flight controller.
- Developed Python code to processes raw thermal frame data and converted it into calibrated crop stress water index, correlating data with field research sampling.
- Collaborated with Washington State University Tree Fruit Research Facility researchers to define and refine data accuracy, deliverable requirements, and orchard use.

Washington Tunnelling (Registered Student Organization)

University of Washington

Fluids and Thermal Team Lead

May 2025-Present

- Led and delegated 4 fluids team engineers.
- Collaboration with 3 teams to design, plan, and implement optimal interfacing system, to perform effectively for tunnel boring.
- Led design for cooling system for tunnel boring machine using thermodynamic principles.
- Designed architecture for soil-treatment system, using SolidWorks and fluid dynamic analysis to support system integration.

City of Wenatchee

Wenatchee, WA

Engineering Intern

June 2025-August 2025

- Researched and evaluated city wide bike infrastructure and presented recommendation for improvements for 10 routes consisting of 20+ miles and 151 additional signs, for public safety and to improve equitable community access.
- Performed large-scale data analysis on 10 years of traffic crash data, 1000+ ADA pedestrian ramps, and Capital Projects data, then compiling into structured datasets to support engineering staff.
- Collaborated with the GIS department to create 3+ maps for the public on the city of Wenatchee website.
- Identified and created safety recommendations for school walk routes through field data collection, compiled into detailed report, and support engineering staff initiative for robust community safety.

SKILLS

Hard Skills | Microsoft Suite, SolidWorks CSWA Certified, MATLAB, ArcGIS, Bluebeam, Soldering, Python

Soft Skills | Project management, Leadership, Communication, Bilingual: English/Spanish

AWARDS

Washington State Opportunity Scholarship

2023, 2024, 2025, 2026

Hispanic Scholarship Fund

2024, 2025, 2026

Washington NASA Space Grant Consortium

2025, 2026

Hispanic Scholarship Fund STEM Summit

2025
